

NeuroMetrix to Present at 6th Annual OneMedForum San Francisco 2013

WALTHAM, Mass.--(BUSINESS WIRE)--Jan. 2, 2013-- NeuroMetrix, Inc. (Nasdaq: NURO), www.neurometrix.com, a medical device company focused on the diagnosis and treatment of the neurological complications of diabetes, today announced that Shai N. Gozani M.D., Ph.D., President and Chief Executive Officer, is scheduled to speak at the 6th Annual OneMedForum at the Sir Frances Drake Hotel, San Francisco, CA on January 7-9, 2013. Dr. Gozani intends to provide an update on the Company's business activities and on its diabetes products including NC-stat® DPNCheck™, a diagnostic test for systemic neuropathies such as diabetic peripheral neuropathy (DPN), and the SENSUS™ pain management device for relief of chronic intractable pain.

NeuroMetrix's presentation is scheduled for Tuesday, January 8, 2013 at 11:40 am (Pacific Standard Time), 2:40 pm (Eastern Standard Time). A live audio webcast will be available on the investor relations section of the corporate website - www.neurometrix.com. This webcast will be archived after the live event.

About NeuroMetrix

NeuroMetrix is an innovative medical device company that develops and markets home use and point-of-care devices, associated consumables, and support software for the treatment and management of diabetes and its complications. The company is focused on nerve related complications of diabetes, called diabetic neuropathies, which affect over 50% of people with diabetes. If left untreated, diabetic neuropathies trigger foot ulcers that may require amputation, cause disabling chronic pain, and increase the risk of falling in the elderly. The annual cost of diabetic neuropathies has been estimated at \$14 billion in the United States. The company's products are used by physicians and other clinicians in retail health settings such as pharmacies, and by managed care organizations to optimize patient care and reduce healthcare costs. The company markets the NC-stat DPNCheck device, which is a rapid, accurate, and quantitative point-of-care test for diabetic neuropathy. This product is used to detect diabetic neuropathy at an early stage and to guide treatment. The company has also begun to market the SENSUS Pain Management System for treating chronic pain, focusing on physicians managing patients with painful diabetic neuropathy. The company has additional therapeutic products in its pipeline. For more information, please visit <http://www.neurometrix.com>.
